Flipster - Desktop and Mobile Requirements

Desktop Requirements

*Flipster* has been tested and confirmed to work on your desktop computer with the following browsers:

<table>
<thead>
<tr>
<th>Browser</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Internet Explorer</td>
<td>Internet Explorer 10 and 11 only</td>
</tr>
<tr>
<td>FireFox</td>
<td>Latest and one previous version</td>
</tr>
<tr>
<td>Safari</td>
<td>Latest and one previous version</td>
</tr>
<tr>
<td>Google Chrome</td>
<td>Latest and one previous version</td>
</tr>
<tr>
<td>Other</td>
<td>JavaScript, Cookies Enabled</td>
</tr>
</tbody>
</table>

Notes:

- Adobe Flash Player 10.0 or later is required to use Text-To-Speech on interfaces in which it is available.
- If you are using an older browser, *Flipster* may function properly, but your results may vary.
- The recommended screen resolution is 1024 x 768.

Mobile Requirements

While the *Flipster* interface and mobile viewer should be accessible using most mobile operating systems, the following operating systems have been tested and confirmed to be supported by *Flipster*:

- **iOS** - Versions 9 and higher
- **Android** - Version 4.2.2 (Jelly Bean) and higher

If you are using a different mobile operating system, your *Flipster* experience may vary.
