I've logged into EBSCO before. Why am I being prompted to log in when I click the link in my Alert or other Persistent Link?

To access persistent links without being asked to log in to EBSCOhost, a cookie must be stored and the "Use Cookies" feature should be activated in EBSCOadmin (even if you are using an authentication method other than cookie authentication).

**To activate cookies in EBSCOadmin:**

2. Click the Authentication Tab.
3. Click the Cookies Sub-Tab.
4. **Consortium only:** Select the Site Name, if applicable.
5. Select the Group ID, or select All Groups.
6. Set Use Cookies to Yes.
7. Click Submit. Your changes are saved.
