**Q. What changes occurred when Readers’ Guide Full Text Select was moved from H. W. Wilson to EBSCO?**

**A.**

H. W. Wilson databases were known for well-developed thesauri and precision indexing. When EBSCO acquired H. W. Wilson’s products, a central goal was to maintain and continue H. W. Wilson’s high-quality indexing using EBSCO’s Comprehensive Subject index (CSI). Working with the H. W. Wilson Editorial team, EBSCO’s lexicographers merged Wilson thesauri with EBSCO’s CSI, and as a result, we have retained the relationships between all H. W. Wilson terms and Wilson-created records, while enhancing our existing controlled vocabulary.
H. W. Wilson terms were mapped to identical or equivalent EBSCO subject headings. In many cases, CSI Editors determined that H. W. Wilson thesaurus headings represented new concepts, and those were added to EBSCO’s Comprehensive Subject Index. Wilson terms that could not be mapped and did not fit criteria for inclusion in EBSCO’s CSI were retained as keywords within the citation records.

Q. How can I set up a URL to link directly into Readers’ Guide Full Text Select?

A. URL parameters can be used to enable direct links from an external web page to the Readers’ Guide Full Text Select Home Page. A sample URL is:

If you would like your users to bypass the Select Service Screen and go directly to a specific EBSCO interface, you should pass the profile parameter on your URL. For example, to reach the Readers’ Guide Full Text Select Home Page, use this URL:
