How can I create an EBSCOhost shortcut icon on my iPhone or Android device?

Adding an EBSCOhost Mobile icon to an iPhone or iPod home screen

You can add an icon to your iPhone or iPod that allows you to access EBSCOhost Mobile directly from your device’s home screen.

To add an EBSCOhost Mobile icon on iOS:

1. On your device, go to the EBSCOhost login screen on the Safari browser at: [http://search.ebscohost.com](http://search.ebscohost.com).

   **Note:** When logging in on your mobile device, EBSCOhost automatically recognizes you as a mobile device user and displays the mobile optimized version of the interface.

2. Click the *Share* button on your browser toolbar at the bottom of the screen.

3. On the resulting options menu, select *Add to Home Screen*.

4. On the *Add to Home* screen, type in a name for your icon and click *Add*.

5. The EBSCOhost Mobile icon appears on your home screen.

If you would like a direct URL to a specific EBSCOhost profile, please contact Tech Support at support@ebsco.com.

Adding an EBSCOhost icon on an Android device home screen

To create an EBSCOhost shortcut on Android:

1. Navigate to [http://search.ebscohost.com](http://search.ebscohost.com) on your Android device’s web browser.

2. Select *Save to bookmarks* from the web browser's menu.

3. Click the *Add to* drop-down menu and select *Home Screen*.

4. Click *OK*
The shortcut is added to your device's home screen.
