Why is EBSCOhost Connection not IP Authenticating in Internet Explorer 9?

If you are unable to IP authenticate using EBSCOhost Connection within IE 9, you will need to add http://connection.ebscohost.com as a Trusted Site. Please see the instructions below:

1. Open Internet Explorer 9.
2. Select **Tools > Internet Options** in the tool bar.
3. Within the **Internet Options** pop-up window, select the **Security** tab.
4. Select the **Trusted Sites** zone option (green checkmark graphic).
5. Select the **Sites** button.
6. Within the next pop-up, enter the text below in the **Add this website to the zone:** text box:

   http://connection.ebscohost.com

7. Select the **Add** button (*Note: make sure that the check box corresponding to **Require server verification (https:) for all sites in this zone** is un-checked.)*
8. Select the **Close** button and then the **OK** button within the pop-ups closing the windows.
