What is in the Image Collection database?

The Image Collection database is offered at no additional charge to customers accessing EBSCOhost proprietary databases including, but not limited to, *Academic Search Premier*, *Academic Search Elite*, *MasterFILE Premier*, and *Middle Search Plus* via EBSCOhost.

The *Image Collection* database consists of more than 1 million total images in these categories, broken down as follows:

- Photographs
- Images from Canadian Press, Getty Images, and UPI
- Maps from Antenna Audio
- Photographs from public domain sources

The images consist of a wide array of photos and maps, with an emphasis on world news and events. Other areas of coverage include contemporary and historical photos of people, places, and the natural kingdom.

A user may access the *Image Collection* databases by clicking the **Images** button on the toolbar at the top of the EBSCOhost screen. The user has the option of filtering her/his results by various categories including:

- Photos of people
- Natural science photos
- Photos of places
- Historical photos
- Maps
- Flags

Upon searching, the user will receive a Result List, which will include citation information as well as thumbnail images. Clicking on any thumbnail image will display the full size image. Images can then be printed or saved.

A copyright statement appears at the bottom of the page for each image. Users can refer to this for general use guidelines.

**What are the sources of images contained in the Image Collection?**

The Image Collection contains images from Archive Photos, Canadian Press, Motion Picture & Television Archive, McClatchy, UPI, and Getty, as well as a variety of images from the public domain.
