How do I search and view EBSCO Discovery Service as a guest?

Administrators have the ability to turn on guest access for their EBSCO Discover Service (EDS) profiles.

If you are accessing EDS as a guest, a log-in prompt banner will be visible on the top of all screens and you will be prompted to log in when clicking a Result List title or full-text link from a database provider (i.e. EBSCO).

To search Discovery Service as a guest user:

1. Enter your terms in the Find field and click Search.

   Note: Depending on your institution, guest access may also be available by using a search box on your institution's web site.

2. A result list is displayed, but you will need to log in to gain full access to the library's resources.

Viewing results as a guest user:

Some results can only be viewed by users who are logged in. Click the Login link and enter your ID and password to view these results.
You will be prompted to log in when you click an article title and full text links from database providers.

From the Detailed Record of a library catalog result, you may be able to view real-time availability information for the item you are viewing.
