Maintaining EDS - EDS Partner Databases

EBSCOadmin allows administrators considerable control over the content added to an EDS profile, such as the addition of new EDS Partner databases, as well as your EBSCO subscriptions.

Keep in mind that managing new content for EDS Partner databases is generally a two-step process.

1. Add the database to your profile (if you have not enabled automatic additions).
2. Then, if the database requires EBSCO to link to the publisher for full-text content, you need to add the appropriate CustomLink. Click here for instructions on adding a CustomLink to a Partner database.
