How does the EBSCO Discovery Service search experience differ from EBSCOhost?

There are several key features that make the *EBSCO Discovery Service* (EDS) searching experience different than EBSCOhost:

- There is no Choose Databases link. All of your EBSCO databases are searched using *EBSCO Discovery Service*.
- Search Options include Discipline Limited Search.
- *EBSCO Discovery Service* employs limiters that are common to all databases being searched.
- There is a Content Type filter on the Results List.
- The top toolbar can be customized by the institution's administrator in EDS.
