How do I limit my EBSCO Discovery Service result list using facets?

Facets appear in the left column of the *EBSCO Discovery Service* (EDS) result list and can be used to limit the results that appear. As users select facets and limiters to refine the search results, terms are added to the *Current Search* box below the *Refine Results* area.

**Available Facets:**

- Subject
- Publisher
- Publication
- Language
- Geography
- Source Type
- Content Provider
- Library Location (*for EDS custom catalog databases only*)
- University (*for American Doctoral Dissertations*)
- Collection (*for institutional repositories only*)

Additional limiters available, depending on the individual institution's configuration, are:

- Peer-Reviewed
- Full Text
- Available in Library Collection
- Date
- Catalog only
- Institutional Repository only

EBSCO Administrators have the option to customize the display, order, and labels associated with facets and limiters via EBSCOadmin.
