What metadata formats are supported for an Institutional Repository database?

At this time we are able to load IR records in XML format that is OAI-PMH retrievable in the following metadata formats:

- Dublin Core (qualified and unqualified) - [Click here for fields EBSCO harvests in this format](#)
- EAD - [Click here for fields EBSCO harvests in this format](#)
- EISIR – [Click here for fields EBSCO harvests in this format](#)
- juni2 - [Click here for fields EBSCO harvests in this format](#)
- METS
- MODS - [Click here for fields EBSCO harvests in this format](#)

If you have additional questions, please contact EDS Support, [eds@ebscohost.com](mailto:eds@ebscohost.com).
