What metadata formats are supported for an Institutional Repository database?

At this time we are able to load IR records in XML format that is OAI-PMH retrievable in the following metadata formats:

- Dublin Core (qualified and unqualified) - Click here for fields EBSCO harvests in this format
- EAD - Click here for fields EBSCO harvests in this format
- EISIR – Click here for fields EBSCO harvests in this format
- junii2 - Click here for fields EBSCO harvests in this format
- METS
- MODS - Click here for fields EBSCO harvests in this format

If you have additional questions, please contact EDS Support, eds@ebscohost.com.
