Customizing Interface Colors in EBSCOadmin

EBSCOadmin allows administrators to customize the interface colors of EBSCOhost and *EBSCO Discovery Service* profiles. For example, an administrator may want to use customization to brand the interface with their institution’s color scheme.

**To customize your EBSCOhost or EBSCO Discovery Service interface colors:**

1. From the **Choose Profile** drop-down menu, select the EBSCOhost profile you would like to customize or your *EBSCO Discovery Service* profile.

2. Click the **Branding** sub-tab.

3. Click the **Modify** link to the right of Customize Colors. The Customize Colors screen is displayed.

4. Click the **Background** or **Text/Link** color you would like to modify to access the color picker tool, or simply enter a hexadecimal color code in the field provided.

5. Use the controls in the color selection tool to select a color and click **OK**.

6. The new color is displayed in the preview box as it will appear on the interface.
7. Repeat for each of the Background and Text/Links colors you would like to customize.

8. Click Submit. Your color changes are saved.

**Notes:**

- It is recommended that Color Three be a lighter version of Color Two and that Color Four be a light color such as #EEEEEE.

- Avoid choosing white for Color Three Text & Links color. Choosing white will cause the Sort By dropdown menu to appear empty.

- Avoid choosing white for Color Four Text and Links color. Choosing white will cause the Share menu to appear empty.

- Avoid choosing blue for Color Four Text and Links color. Choosing blue will cause the page navigation text and links to all be the same color.

- If you need assistance determining your institution’s colors from a website, try the ColorZilla plug-in for FireFox at [http://www.colorzilla.com](http://www.colorzilla.com).
