How do I set up Patron ID Authentication?

A patron ID is a means of authentication that lets you use library or patron card numbers (up to 20 characters) to control access. The librarian provides EBSCO with a list of IDs that are used to identify users requesting access to databases. Without an ID number, assigned by library staff, the user cannot access EBSCO host. You can also customize the login prompts, and easily delete one user's access without affecting other users.

To set up Patron ID Authentication:

1. Click the Authentication Tab. From the drop-down lists on the toolbar, select the site you want to work with.
2. Click the Patron Files Sub-Tab. Click the Add Patron ID Link. The Add Patron ID Screen appears.
3. If you are administering a library consortium, from the Site ID drop-down list, select the site.
4. From the Group ID drop-down list, select the Group.
5. In the Patron ID field, enter your new patron ID. For example: 011012365712
6. In the Password field, enter the password you want the patron to use.
7. Click Submit. The list of patron IDs appears with your new patron ID displayed.

You can modify the patron ID for any user group by clicking on the linked patron ID in the list.

You can upload all of your patron IDs and passwords to EBSCO admin from a delimited text file. The base EBSCO host URL for this authentication scheme is http://search.ebscohost.com/login.aspx?authtype=custuid&custid=custid where custid identifies your library's customer ID within EBSCO admin.

You can also direct your users to a specific profile by adding a profile ID to the end of the URL. (For example, http://search.ebscohost.com/login.aspx?authtype=custuid&custid=custid&profile=profileid where profileid identifies one of your profiles.
