How does Full Text Finder display title history?

How title history is reflected within EBSCO’s Global Knowledge Base depends on how a vendor handles this information on their website and within their title lists. Title history will be added if provided in the title lists obtained by EBSCO’s Title Information Department.

When a title history is available it appears in Publication Finder in the Title History section of the Detailed Record.

In addition, if a user searches on a previous title it will be retrieved if an exact match is made against a title noted in the title history. Click here for more information on exact matching.
