EBSCOadmin

This page enables you to browse all of the available support documentation related to how administrators can customize EBSCO interfaces with EBSCOadmin.

EBSCOadmin provides the ability for the library administrator at the institutional level or the consortium level to customize your EBSCO interfaces in a variety of different ways. You can customize individual workstations with database access and software features. Search tools including search limiters and expanders, print options, linking options, local holdings information, and links to your library homepage can be modified.

- **EBSCOadmin - User Guide**

  This user guide provides administrators with information on EBSCOadmin features including interface customization, branding, and reports and statistics.

  - How can I access COUNTER reports using EBSCOadmin?
  - Adding a new administrator and assigning roles for access to EBSCOadmin
