EBSCOhost Integrated Search

This page enables you to browse all of the available support documentation related to EBSCOhost Integrated Search (EHIS).

EBSCOhost Integrated Search allows users to simultaneously search EBSCO databases as well as all other electronic resources, including those from other database aggregators, OPACs, and publisher packages. However, unlike federated search products, true integration is possible with EBSCOhost Integrated Search as libraries can now apply the powerful EBSCOhost search experience to all of their other electronic information resources.

- EBSCOhost Integrated Search - User Guide

This user guide covers how to use the features of EBSCOhost Integrated Search.

- Choosing EBSCOhost Integrated Search Databases
- How do I contact technical support for EBSCOhost Integrated Search?
- Why are my EBSCOhost Integrated Search connectors returning results with my search terms in the title, subject and sometimes abstract fields and not the fields I selected to search?
- How is the EBSCOhost Integrated Search result list affected by de-duplication and relevancy ranking?
- Can I save Integrated Search results from non-EBSCOhost sources to my personal My EBSCOhost folder?
- Using EBSCOhost Integrated Search
