Can I set up a preferred authentication order that applies to persistent links created in EBSCOhost?

Using the EBSCOadmin module, library administrators can set a preferred authentication order for persistent links built within EBSCOhost.

**To set up a preferred authentication order for persistent links:**

2. Click the **Customize Services** Tab, then click the **Linking** Sub-Tab.
3. Under the Persistent Links heading, next to Preferred Authentication Order for Persistent Links, enter the authentication methods in the order you want them administered in EBSCOhost.
4. Click **Submit**. Your changes are saved.
