If I enable grouping databases by subject area, which subject areas will appear in my database list?

The specific number of subject areas present in your drop down list depends on the databases found within your profile. The larger and more diverse the collection of databases in the profile, the more entries you will see. At present, here is the complete list of subject areas that may appear in the drop down list:

- Arts/Architecture
- History
- Literature
- Performing Arts/Theatre
- Earth/Environment
- Law/Political Science
- Computer Science/Engineering
- Health Sciences
- Business/Economics
- Psychology/Sociology
- Education
- Philosophy/Religion
- Gender/Sexuality
- Communications/Media
- General/News
- Life Sciences
