Why doesn't EBSCO automatically append my Proxy settings for Persistent Links to EBSCO RSS Alerts?

If your institution uses a proxy server, you should be aware of changes in the way EBSCO RSS Alert feed formats are handled.

- **RSS Feeds** - Proxy information is **not** appended to the link for an RSS feed, even if you specified a Proxy for Persistent Links in the Linking Tab in EBSCOadmin. The RSS feed **does not** require EBSCO authentication.

- **Links to Articles published on the RSS Feed** - Proxy information is **appended** to the links to articles within the feed, if you specify a Proxy for Persistent Links in the Linking Tab in EBSCOadmin. Access to *articles* published on EBSCO Alert RSS feeds **do** require EBSCO authentication.
