EBSCO Help

How do I Set up a Link to my OCLC ILL on FirstSearch in EBSCOadmin?

EBSCOhost customers can link to their OCLC FirstSearch ILL using the CustomLink template labeled “OCLC FirstSearch” under the Full Text category in EBSCOadmin. This link will allow you to link to full text in FirstSearch and if there is no full text available provide users with your OCLC ILL option.

Please note:

- ILL linking on OCLC FirstSearch is only available for articles that are indexed in FirstSearch.
- The ILL link will only appear if your primary FirstSearch authorization is via IP recognition.
