How are abstract views counted in EBSCO Reports and Statistics?

Abstract views are counted as followed:

- When a user hovers over the Article Preview feature for an article in the result list and the preview is viewed, it is counted in an institution's statistics as an Abstract Request in EBSCOadmin.

- When an EBSCO interface (EBSCOhost, EBSCO Discovery Service, etc.) result list is set to "Standard" in EBSCOadmin, partial abstracts that are displayed in a result list are not counted as Abstract Requests in EBSCOadmin statistics.
