How do I customize which limiters appear under Refine my Results on my result list?

On the result list, you can customize which three limiters display in the **Refine your Results** area without needing to select the **Show More** link.

**To customize the limiters that appear under Refine your Results:**

2. Select the profile you would like to alter under the **Choose Profile** drop-down list.
3. Select the **Searching** sub-tab.
4. Scroll down to the **Limiter & Expander Settings** section and select the **Modify** link to the right of **Limiters**.
5. Re-order your limiters by setting the order number for each limiter in the **Order** column.
6. Click **Submit**.

The first three limiters on your ordered list appear by default on the result list under **Refine your Results**. All other limiters are available to your users if they select **Show More**.
