CINAHL Case Scenario #2 - Work Related Stress

CINAHL Search: Clinical Case Scenarios

#2 - work related stress

A nurse manager is worried about her staff. She wants to know if the hours that they are working affect their physical and / or mental health.

Find evidence that working shifts can be detrimental to the health of nursing staff.

Search:

- Nurses as a CINAHL Heading. Select Explore and Major
- Shiftwork as a CINAHL Heading
- Occupational stress as a CINAHL Heading. Select Explore
- Use AND to combine the three terms

You may wish to fine tune your search to the following:

- Select Revise your search. From limit your results tick the Peer Reviewed box

Have a look through the results list.
